TakeSure

CONFIDENCE BEFORE TAKING SOMETHING

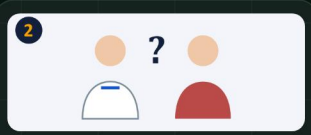

AYURVEDA × ALLOPATHY · INTERACTION CHECKER

Two medicines. One question. Ask before you take.

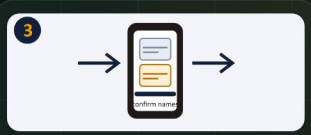

Ashwagandha can raise thyroid hormone. Giloy can fight a transplant drug. Guggul can thin blood further. The doctor rarely asks, the patient rarely tells. TakeSure checks the pair against published evidence and answers in Hindi or English.

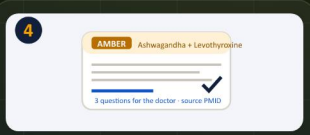

Mother takes Thyronorm and starts ashwagandha for stress.

Nobody asks, nobody tells. The label says nothing.

She photographs both. TakeSure reads and confirms the names.

AMBER. A source, timing advice, three questions. PDF to the doctor.

01 · SCAN

Photograph both

The prescription and the Ayurvedic box. Or just type the names. Every name is confirmed first.

02 · CHECK

Rules, not guesses

Every herb–drug pair is checked against a cited knowledge base graded A / B / C.

03 · KNOW

Hindi or English

A clear verdict, three questions for your doctor, a PDF, and a Ministry of Ayush reaction report.

- **The verdict comes from published data. AI only explains it.**

37%

of hospital patients take allopathic and herbal medicines together

19%

ever tell their doctor about the herbs they take

0

public tools check an Ayurvedic product against a prescription. Until now.
