TakeSure
CONFIDENCE BEFORE TAKING SOMETHING

Ayurveda × Allopathy interaction checker
Team Bug Hunters · HACK@BVP 8.0

Two systems. One body. Nobody checks the pair.

The doctor's tablet and the family's herb are taken together in half of India's homes. The doctor never asks, the chemist has no tool, the label says nothing. TakeSure checks the pair against published evidence, in Hindi or English.

✓ GREEN
Triphala + Metformin — keep a 2–3 hour gap, that is all.

! AMBER
Ashwagandha + Levothyroxine — may raise thyroid hormone; ask your doctor.

!! RED
Guggul + Warfarin — bleeding risk; do not combine without your doctor.

? NOT IN DATABASE
When we do not know, we say so. We never guess green.

01 · SCAN
Photograph both
Prescription and product label, or type the names. Every name is confirmed first.

02 · CHECK
Rules, not guesses
Every herb–drug pair checked against a cited knowledge base graded A / B / C.

03 · KNOW
Hindi or English
A verdict, three questions for your doctor, a PDF and a Ministry of Ayush report.

Pehle check karo, *phir lo.*

THE VERDICT COMES FROM PUBLISHED DATA · AI ONLY EXPLAINS · DECISION SUPPORT, NEVER DIAGNOSIS

Sure-ji · the one who checks first
